

Homegrown fruits promote healthy lifestyle

There's nothing much fresher and more healthy than a big basket of homegrown fruit. That's why we partner with Dave Wilson Nursery to bring you the finest quality and assortment of fruit trees for your garden center and landscape customers. In early spring, we establish a wide assortment of Wilson's budded, field-grown bare root fruit trees in #7 containers. Small enough to be portable and affordable, these trees are big enough to begin producing fruit soon after they are planted. They are the perfect size for garden centers sales.

For more information on our fruit tree line, go to <http://www.jfschmidt.com/fruit>

Elberta Peach

This popular old freestone variety bears large, red-blushed, golden-yellow fruits with classic peach taste and aroma. Ripening in mid-August, it needs 600 chilling hours and is self-fruitful and resistant to brown rot. A bright pink display of fragrant flowers is a springtime bonus for gardeners and pollinators.
