

Evening Light Snowbell

(*Styrax japonicus* 'Evening Light' PP 24168)

Think of Evening Light Snowbell as the essential little black dress of the garden - especially when accessorized with dazzling pearl-like buds that burst into bloom in June. Its glossy purple-black foliage is unique among snowbells, providing a dramatically dark backdrop for the profusion of fragrant white, bell shaped flowers that appear late in the season when few trees offer a floral display. With adequate soil moisture, some reblooming will occur. Heat-resistant foliage maintains its dark hue throughout the hot summer months. Upright oval in form, it reaches a mature height and spread of approximately 15' x 10'.
