

Urban Sunset[®] MAPLE

Acer truncatum × *A. plat.* 'JFS-KW187' P.A.F.

Urban Sunset[®] Maple is a natural born street tree. Selected as an outstanding performer from our nearly 30 year effort to combine the best characteristics of Asian and European maple species, it calipers well and develops a uniformly branched canopy with minimal pruning. Upright growing with a strong central leader, it remains compact and narrow as it develops an ideal street tree form. It produces very few seeds and is pest and disease resistant.

Dark green leaves are glossy and tatter-resistant. This heat and drought-tolerant tree features dark green, glossy leaves that explode with bright to deep red tones in autumn. Hardy through USDA Zone 4b, it matures to a height of approximately 35' and spread of 20 feet.
