

# Homegrown fruits promote healthy lifestyle

There's nothing much fresher and more healthy than a big basket of homegrown fruit. That's why we partner with Dave Wilson Nursery to bring you the finest quality and assortment of fruit trees for your garden center and landscape customers. In early spring, we establish a wide assortment of Wilson's budded, field-grown bare root fruit trees in #7 containers. Small enough to be portable and affordable, these trees are big enough to begin producing fruit soon after they are planted. They are the perfect size for garden centers sales.

Our selection ranges from traditional classics such as **Bing Cherry** and **Elberta Peach**, to rare and exceptionally delicious interspecific hybrids such as Pluots and Pluerrys.

**Flavor King Pluot**<sup>®</sup> is a farmer's market favorite, combining the best of plum-apricot flavors and character in a supersweet, juicy and delicious fruit. **Dapple Dandy Pluot**<sup>®</sup> offers spicy, plum-apricot flavors. **Sweet Treat Pluerry**<sup>®</sup> combines the best of four species, combining the sweetness of a cherry with the zing of a plum, and the juicy sweetness of peach and apricot. The crisp and juicy fruits of **20th Century Asian Pear** crunch like an apple, but taste more like a pear.

For more information on our fruit tree line, go to <http://www.jfschmidt.com/fruit> There you'll find detailed descriptions of the fruit trees we offer, including information about rootstocks, pollinizers, chilling requirements plus a link to Dave Wilson Nursery's Backyard Orchard Culture resource.
