

MESA GLOW[®]

M A P L E

Acer grandidentatum 'JFS-NuMex 3' PP 27930

Mesa Glow[®] Maple delivers the blazing fall color of rugged Rocky Mountain canyons to cityscapes. Its glossy dark green leaves withstand the heat, drought and drying winds of summer with ease before turning bright orange to orange-red in autumn.

Its uniform canopy is perfectly suited for street tree plantings and landscapes where a predictably mid-size shade tree is needed. Upright branches form a symmetrically oval canopy as Mesa

Glow[®] Maple grows to a mature height of 28 x 18 feet.

Developed by Dr. Rolston St. Hilaire at New Mexico State University, it was selected as a top performer among thousands of Bigtooth Maple seedlings grown from seeds collected from many Southwest sites.

Cold hardiness, adaptability to heat, drought and other environmental stresses, make it a tree of choice for urban landscapes of the Intermountain West and beyond.
