

Zelkova cultivars tailor made for tight spaces

Tall and skinny or short and wide, there's a Zelkova tailor-made for every urban space. While most tree planters are familiar with the upright, arching forms of Green Vase[®], Village Green[®] and Musashino Zelkova, two of our newer cultivars are a great fit for street plantings beneath and near utility lines and have earned our UtiliTrees[™] designation.

Wireless[®] Zelkova

(*Zelkova serrata* 'Schmidtlow') is selected for its low height and broad spreading shape that is ideal for street plantings beneath utility lines. Its broadly spreading vase shape reaches a mature height and spread of about 24 x 36 ft. Red fall color is an added bonus.

City Sprite[®] Zelkova

(*Zelkova serrata* 'JFS-KW1') is uniquely compact and semi-dwarf. Bright green, fine textured foliage and short internodes contribute to its dense canopy resulting is the perfect little tree for tight urban spaces. Oval to vase-shaped, it grows to a height and spread of approximately 24 x 18 ft.
