

# Symatree® Maple

*Acer saccharinum* 'JFS H1'

**Zone:** 3  
**Height:** 30'  
**Spread:** 20'  
**Shape:** Upright oval  
**Foliage:** Light green, silvery beneath  
**Fall Color:** Bright yellow to burgundy red  
**Fruit:** None observed

A standout seedling, grown from seed collected from a witch's broom, was selected by Dr. William Hoch in Wisconsin for its uniquely compact growth habit and excellent branch structure that forms a remarkably symmetrical, upright oval tree. During more than 20 years of close observation, neither flowers or seeds have appeared on the parent tree.
