

# Urban Stretch™ Hardy Rubber Tree

*Eucommia ulmoides* 'JFS KW6EU'

**Zone:** 5  
**Height:** 45'  
**Spread:** 30'  
**Shape:** Upright oval  
**Foliage:** Dark green

Urban Stretch™ Hardy Rubber Tree was selected and trialed at JFS for its more uniform, symmetrical growth habit. A strong grower, it has a narrower more upright shape than a typical seedling grown tree. Its form makes it an excellent choice for urban street and park plantings.
